

Overview of Vocational Scenario in India

Objectives: At the end of this lesson, you shall be able to:

- state the importance of vocational training in India
- brief the governing Agencies of vocational training in India
- describe the various schemes of NCVT
- brief the various skill implementing agencies.

The term “vocational” means providing skills and education that prepares individuals for a job, or enables the training of skilled craftsmen.

The planning commission defines a skilled craftsman as a worker who belongs to an occupation. They are found in several industries.

The Government of India had initially started the War Technicians Training Scheme in the year 1940 at Koni Bilaspur, now Chhattisgarh state, long before the new factory system of manufacturing which took root in India.

The War Technician Scheme was later followed by the Technical Training Scheme in 1946. All these schemes were modified and merged into a comprehensive scheme known as Vocational Training Scheme, designed for training demobilised service personnel, it was closed in July 1950.

After the completion of Ex-servicemen's Training Schemes, the training of civilians started on a National basis by establishing Industrial Training Institutes (ITIs) by the Government of India in 1950, under the Head of Directorate General of Employment and Training (DGET) in the Ministry of Labour and Welfare.

At present, it is called the Directorate General of Training (DGT) under the Ministry of Skill Development and Entrepreneurship.

Directorate General of Training (DGT):

The Directorate General of Training (DGT) in the Ministry of Skill Development and Entrepreneurship, is an apex organization which enables the development and coordination of the Vocational Training including Women Vocational Training along with the employable youth in the country. It provides skilled manpower to the Economy, Directorate General of Employment & Training (DGE&T) which was priorly under Deputy Director General (Training) & Deputy Director General (Apprenticeship Training) along with their support systems were transferred to the Ministry of Skill Development and Entrepreneurship.

Major Roles of DGT:

- Policy formulation on vocational training
- Laying down Standards
- Revising course curricula
- Granting affiliation
- Trade testing

- Certification

Functions:

DGT affiliated institutions offers a wide range of training courses catering to the needs of different segments in the labour market. Courses are available for school drop outs, ITI pass outs, ITI instructors, industrial workers, technicians, junior and middle level executives, supervisors/foremen, women, physically disabled persons and SC/STs. It also conducts training oriented research and develops instructional media packages for the use of trainees and instructors etc.

DGT acts as a Secretariat, which is an implementing arm of National Council for Vocational Training.

National Council for Vocational Training (NCVT):

National Council for Vocational Training (NCVT) is a tripartite body which was set up through a resolution by the Ministry of Labour in 1956, to advice on issues relating to “Vocational Training” including Craftsman Training Schemes such as designing of curricula, maintaining quality standards, deciding norms for affiliation, granting affiliation to institutes, trade testing and certification.

After being transferred to the Ministry of Skill Development and Entrepreneurship (MSDE), NCVT has been partially modified and re-constituted under the chairmanship of Honourable Minister of State (IC). Skill Development and Entrepreneurship, w.e.f. 13/05/2015.

The council consists of representatives of Central Ministries, State Governments, employers organisations and employees organisations. Secretarial support to NCVT is provided by DGT, professional learned bodies, experts and representatives of SC/ST.

The Major Functions of the NCVT are:

- Establishing and awarding National trade certificates for engineering trades.
- Prescribing standards with respect of syllabi, equipment, and scale of space, duration of courses and methods of training.
- Arranging trade tests in various trade courses and laying down standards of proficiency that is required to passing the trade test.
- Arranging for ad-hoc or periodical inspections of training institutions in the country.

- Laying down conditions & to recognize training institutions run by government or by private agencies for the purpose of granting National trade certificates.
- Prescribing qualification for the technical staff of training institutions.
- Prescribing the standards and conditions of eligibility for awarding National trade certificates.
- Recommending provisions of additional training facilities wherever necessary and rendering such assistance for setting up of additional training institutions/organisations for additional training programmes.

Similarly, State Council for Vocational Training (SCVT) was constituted to advice respective State Government on issues relating to the Skill Development. These SCVTs have been advised by NCVT to be registered as societies under Society Registration ACT 1861.

NCVT MIS Portal: Directorate General of Training has launched the NCVT MIS portal to access information online, related to ITIs including:

- Information of all affiliated Government and Private Industrial Training Institutes (ITIs).
- Candidates seeking skill training/apprenticeship training.
- Employers seeking skilled workers.
- Citizen information and feedback.
- ITI approved courses.
- Enrolment transparency.
- Training/academic schedule.
- Visibility on self - profile and training progress.
- Online access to e-mark sheet and e-certificates.
- E-mail and SMS alerts.
- Placement facilitation.
- STAR grading of ITIs.

More information related to NCVT - MIS portal is available on www.ncvtmis.gov.in website.

Regional Directorate of Apprenticeship Training (RDAT) is responsible for monitoring the implementation of the apprenticeship act for trade apprentices in central government undertaking related departments.

At present, there are 6 RDATs which are located in Chennai (Tamilnadu), Faridabad (Haryana), Hyderabad (Telangana), Kanpur (Uttar Pradesh), Kolkata (West Bengal), and Mumbai (Maharashtra).

National Skill Development Agency (NSDA):

The National Skill Development Agency (NSDA) is a quality assurance and policy research body of the Ministry of Skill Development and Entrepreneurship in the skilling ecosystem. The National Skill Development Agency was notified in June 2013 by subsuming the Prime Minister's National Council on Skill Development, the National Skill Development Coordination Board and the office of the

adviser to PM on skill development. NSDA is an autonomous body registered as a society under the Society's Registration Act 1860. The Ministry of Skill Development and Entrepreneurship is the nodal ministry for the NSDA.

As per the gazette notification dated 6th June, 2013 the functions assigned to the NSDA includes:

- Taking all possible steps to meet skilling targets as envisaged in the 12th five year plan and beyond.
- Ensuring that the disadvantaged and the marginalised groups like SCs, STs, OBCs, minorities, women and differently abled people are equipped with essential skills.
- Nodal agency for state development missions.
- Coordinating and harmonizing the approach to skill development among various central ministries, departments, state governments, NSDC, and private players.
- Anchoring and operationalizing the NSQF.
- Raising extra-budgetary resources for skill development.
- Evaluating existing skill development schemes to assess their efficiency, and to suggest right actions.
- Creating and maintaining a national database related to skill development including development of a dynamic Labour Market Information System (LMIS).
- Affirmative action for advocacy.
- Discharge of any other function entrusted by the government.

Additional functions of NSDA as per the National Policy for Skill Development & Entrepreneurship, 2015 are given below:

- To establish and operationalise a Quality Assurance Framework (QAF) embedded in NSQF to improve consistency of outcomes in the skills landscape, which includes laying down a framework for training, assessment certification process and agencies in the country.
- Establishment of a National Skill Research Division (NSRD) housed under NSDA which serves as a think tank for inputs on research related to skill development and evolve as a credible research organization in skill development at the national level. It aims to serve as an authentic, qualitative and accessible think tank for research related to skill development in India.
- Develop national protocols for registration and accreditation of private trainers.
- Promote the use of skill India logo on skill certificates by SSCs/agencies adhering to the QA framework.

National Skills Qualifications Framework (NSQF):

The National Skills Qualifications Framework (NSQF) is a competency based framework that organizes all qualifications according to the series of levels of

knowledge, skills and aptitude. These levels, graded from one to ten, are defined in terms of learning outcomes which the learner must possess regardless of whether they are obtained through formal or informal learning.

NSQF in India was notified on 27th December 2013. All other frameworks, including the NVEQF (National Vocational Educational Qualification Framework) released by the Ministry of HRD, have been superseded by the NSQF. Government funding is also expected to be on preferential basis for NSQF compliant training/educational programmes/courses.

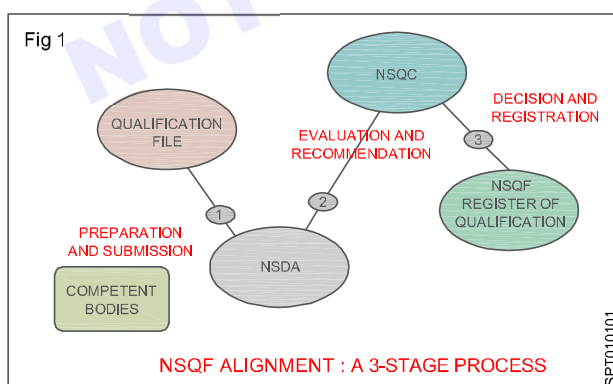

The NSQF would facilitate a paradigm shift from education focused on inputs to an outcomes/competency based education. Which would help in the recognition of prior learning, and simultaneously enable the alignment of the Indian qualifications with international ones.

It is a competency based framework that organizes qualifications into ten levels, with the entry level being 1, and the highest level being 10. Each of these levels is characterised by the following categories of competencies:

- **Professional Knowledge** - What the person must know at the level of competency.
- **Professional Skills** - What the person should be able to do at the level of competency.
- **Core Skills** - This includes soft and interpersonal skills.
- **Responsibility** - The degree of supervision that needs to be exercised over a person while doing the job, or the degree of supervision that person is capable of exercising over others.

Process of NSQF Alignment:

Awarding bodies submit their qualifications/courses to NSDA in order to seek approval from NSQC for NSQF alignment. The awarding bodies submit their information in a template called qualification file. The qualification file is the means by which awarding bodies present the evidence to the National Skills Qualification Committee that their qualifications are NSQF compliant.

A qualification file captures all necessary information to establish NSQF compliance for a qualification. The qualification file is a folder which contains:

- A summary sheet, in which information about the qualification must be provided.
- A structured document, in which information demonstrating that the qualification meets the NSQF requirements, must be provided.

- Supporting evidence attached to the qualification file - i.e. existing documents which are included to back up the information in the completed file.

Qualification File Template:

Qualification:

- Title - Enter the full title of the qualification as it will appear on certificates. Title should be as clear and informative as possible.
- Any identification number that has been formally allocated to the qualification by the certifying body should be included here.

Nature and Purpose of the Qualification:

- Indicate the nature of the qualification. For example, a qualification pack (QP) a trade certificate aligned to QP, a diploma that incorporates National Occupational Standards (NOS), or a Qualification not directly linked to any QP or NOS.
- Indicate the main purpose of the qualification and the target learners. For example, a qualification designed to get people into work, intended for people already in work, and to allow people to add new skills based on technological changes.

Craftsmen Training Scheme (CTS):

The Directorate General of Training (DGT) (erstwhile DGE&T, Ministry of Labour and Employment) in the Ministry of Skill Development and Entrepreneurship, Government of India, initiated Craftsmen Training Scheme (CTS) in 1950, by establishing about 50 Industrial Training Institutes (ITIs) for imparting skills in various vocational trades to meet the skilled manpower requirements for technological and industrial growth of the country. The second major phase of increase in ITIs came with the oilboom in West-Asia and export of skilled manpower to that region from India. Several new private ITIs were established in 1980's primarily in southern states mostly in Kerala, Karnataka, and Andhra Pradesh, etc. whose trained craftsmen had found placement mainly in Gulf countries. In the 1980's, there were 830 ITIs and the number rose to 1,900 ITIs in 1987. During 1990's, the growth of ITIs was steep and presently there are over 10,750 ITIs (2,275 in Government Sector and 8,475 in Private Sector) with a total seating capacity of 15.22 lakhs.

Under the constitution of India, Vocational training is the concurrent subject of both Central and State Governments. The development of training schemes at National level, evolution of policy, laying of training standards, norms, conducting of examinations, certification, etc. are the responsibilities of the Central Government, whereas the implementation of the training schemes largely rests with the State Governments/UT Administrators. The Central Government is advised by the National Council of Vocational Training (NCVT), a tripartite body with representatives from employers, workers, and Central/ State Governments. Similar Councils, termed State Councils for Vocational Training, are constituted for the same purpose by the respective State Governments at the state levels.

Dual System of Training (DST):

Objective:

The objective of the DST scheme is to enable industries and establishments to partner with Government and Private ITIs for conducting training programmes under high employability courses to fulfil their skilled manpower requirements. The DST is a combination of theoretical training imparted through ITIs and practical training imparted through the Industry. DST helps enable Industry linkages and provides hands on experience to students on the latest and updated technologies used in industries.

Under the DST scheme, courses are conducted to meet the skilled workforce requirements of Industry. After completing the training, trainees are awarded the National Trade Certificate (NTC) under the scheme have an edge over regular ITI pass outs in terms of employability and employment opportunities in Industry. With the vision of strengthening Industry linkages and acquainting ITI students with the latest technologies used in the Industry, DGT encourages ITIs to participate in the DST program so that these ITI trainees are Industry ready.

Eligibility of ITIs:

All affiliated ITIs (Government and Private) can conduct training under DST in their relevant affiliated trade(s).

Courses and Curriculum for DST:

The Dual System of Training has been expanded to all the trades, including service sector trades, and trades in new and emerging sectors. All these courses will be NSQF aligned.

Duration of Training:

Sl.No.	Duration of the Course /Trade	Duration of Industrial exposure/training (as per the revised guidelines)
1.	6 months	1-3 months
2.	1 year	3-6 months
3.	2 years	6-12 months

- 1 Duration of industrial training as indicated in the table below:
- 2 The Industry / ITI has flexibility in deciding the duration of ITI and Industry training blocks for the entire training period within this range.

Eligibility Criteria for Industries:

Sl.No.	Parameter	Eligibility Criteria (Revised)	
		Engineering Trade	Non-Engineering Trade
1.	Minimum No. of Employees in the Industry	40	6
2.	Minimum Turn over of the Industry (In INR)	1 crore / year (for last 3 years)	10 lakhs/ year (for last 2 years)

Semester System:

Structure of training programme has been converted into semester system instead of long term, w.e.f Aug, 2013.

The courses are designed to impart basic skills and knowledge of the trades to prepare the trainee for employment as a semi-skilled worker or for self-employment.

As 70% of the training period is allotted to practical training and the rest to subjects relating to Trade Theory, Workshop Calculation and Science, Engineering Drawing. Therefore, emphasis is on skill building.

For overall personality development of trainees, a course on "Employability Skill" has been introduced from July, 2012. The subject introduces IT Literacy, English Literacy, Occupational Safety and Health, Quality tools, Communication Skills, Entrepreneurship Skills, Environment Education and Labour Welfare Legislation.

An Overview of Apprenticeship Training Scheme:

Background:

Development of human resource is crucial for the industrial development of any nation. Upgradation of skills is an important component of Human Resource Development. Training imparted in institutions alone is not sufficient for the acquisition of skills and needs to be supplemented by training at the workplace. The Apprentices Act, 1961 was enacted with the primary objective of fully utilizing the facilities available in industry for imparting practical training, with a view to meeting the requirements of skilled manpower for industry. Initially, the Act covered the apprenticeship training for trade Apprentices and was subsequently amended in 1973, 1986 and 2014 to include Graduates, Technician, Technician (Vocational) and Optional Trade Apprentices under its purview.

Objectives:

The Apprentices Act, 1961 was enacted with the following objectives:

- To regulate the programme of training of apprentices in the industry to conform to the syllabi, period of training etc. as laid down by the Central Apprenticeship Council.
- To fully utilise the facilities available in the industry for imparting practical training with a view of meeting the requirements of skilled manpower for industry.

Monitoring of the Implementation of the Act:

- The Directorate General of Training under the Ministry of Skill Development and Entrepreneurship monitors the implementation of the Apprentices Act in respect of Trade Apprentices in the Central Government Undertakings and Departments and establishments operating business in four or more states through six Regional Directorates of Apprenticeship Training (RDAT) located in Chennai, Faridabad, Hyderabad, Kanpur, Kolkata, and Mumbai.
- State Apprenticeship Advisers are responsible for the implementation of the Act in respect of Trade Apprentices in State Government undertakings/ departments and private establishments.

- The Department of Education in the Ministry of Human Resource Development is responsible for monitoring the implementation of the act in respect of Graduate, Technician and Technician (vocational) Apprentices. This monitoring is done through four Boards of Apprenticeship Training (BOAT) located in Chennai, Kanpur, Kolkata, and Mumbai.

Central Apprenticeship Council:

- It is an apex statutory body. It is tripartite in its constitution, with members from both Central and State/UTs, Governments Employers, etc.
- It advises the Government on laying down of policies and prescribing norms and standards in respect of apprenticeship training.

Fields of Apprenticeship Training:

Apprenticeship training can be provided to apprentices both in designated and optional trades.

- Designated trade:** A designated trade refers to any trade or occupation as notified by the Government.
- Optional trade:** An optional trade refers to any trade or occupation decided by an employer.

Categories of Apprentices:

There are five categories of apprentices:

- Trade apprentices
- Graduate apprentices
- Technician apprentices
- Technician (Vocational) apprentices
- Optional trade apprentices

Coverage:

- It is obligatory for employers with a manpower strength of 40 or more and the requisite training infrastructure as laid down in the Act, to engage apprentices.
- Employers shall engage of apprentices in a band of 2.5% to 10% of the total manpower strength of the establishments, including contractual staff.
- The total engagements of apprentices within the bandwidth 2.5% to 10% includes all categories of apprentices engaged by the establishment.
- Establishments/Employers can decide the categories of apprentices and trade(s) in which the apprentices are to be engaged, depending on the facilities available with them for imparting on-the-job practical training at their workplace.

Stipend (year wise)	
Year	Minimum Rate of Stipend
First year	70% of the minimum wage of semi- skilled workers as notified by the respective State or Union territory.
Second year	80% of the minimum wage of semi-skilled workers as notified by the respective State or Union territory.
Third & Fourth year	90% of the minimum wage of semi-skilled workers as notified by the respective State or Union territory.

Stipend:

The minimum rate of stipend per month payable to trade apprentices is as follows:

- The expenditure on stipends for trade apprentices is borne by the employers.
- The rates of stipends for Graduates, Technicians and (Vocational) apprentices are Rs. 4,984 per month, Rs. 3,542 per month, and Rs. 2,758 per month respectively. (effective from December 19, 2014).
- The expenditure on Stipends for the categories of Graduates, Technicians and Technician (Vocational) apprentices is shared equally between the employer and the Central Government.

Training of Trade Apprentices:

- The minimum age is 14 years.
- Qualifications vary from Class VIII passed class to XII passed (10+2 system).
- The period of training varies from one year to two years.
- This Training comprises Basic Training and Practical Training, followed by Related Instructions as per the prescribed syllabus for each trade.
- 261 trades in 39 trade groups have been designated.
- The numbers of seats for apprentices is calculated in the band of 2.5% to 10% of the total strength of the workers.
- Every apprentice and employer must enter into a contract of apprenticeship training, which is registered by the Apprenticeship Advisers.
- Employers and apprentices must fulfill their obligations under the Act.

Testing and Certification of Trade Apprentices:

- All India Trade Tests (AITT) for trade apprentices are conducted by the National Council of Vocational Training (NCVT) twice a year (October/November and April/May).
- National Apprenticeship Certificates (NAC) are awarded to those who pass the AITT.
- NAC is recognized for employment under Government/ Semi-government departments/ organizations.

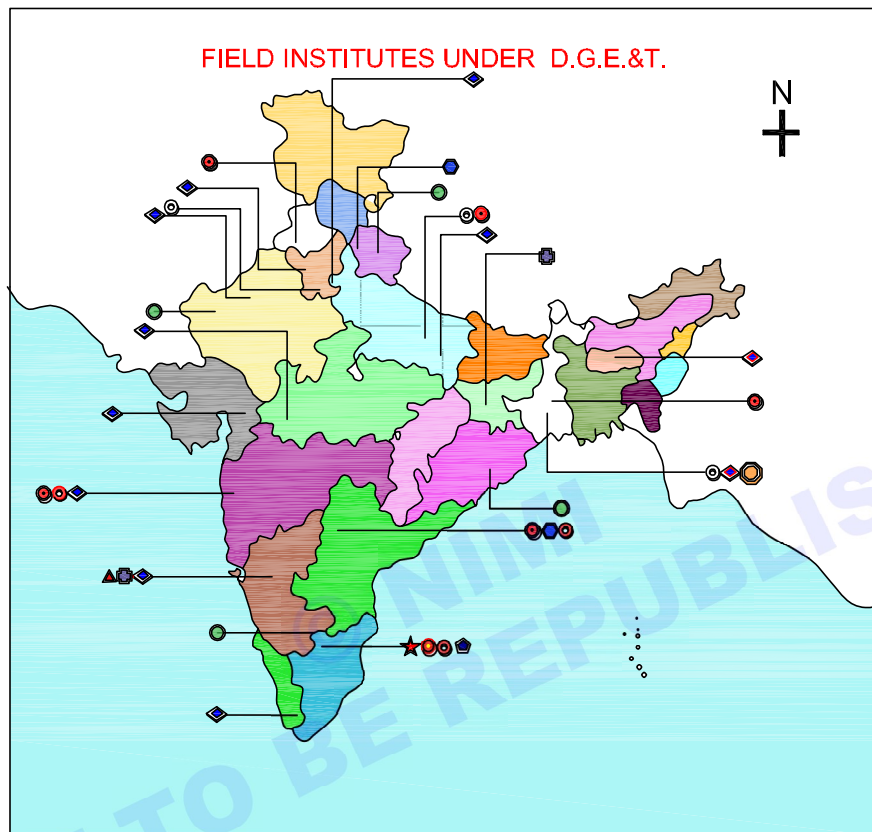

Skill Competition of Trade Apprentices:

- To foster healthy competition among apprentices and establishments, skill competitions are organized at local, regional and All Indian levels.
- Skill competitions are held for 15 trades namely: Fitter, Machinist, Turner, Welder (GMAW & GTAW), Electrician, Mechanic Motor Vehicle, Tool & Die Maker (Die & Moulds), Tool and Die Maker (Press Tool, Jigs & Fixture), Instrument Mechanic, Draughtsman Mechanical, Mechanic Machine Tool Maintenance, Wireman, Mechanic Diesel, Refrigeration & Air-conditioning, and Electronics Mechanic.

Training of Graduates, Technicians and Technician (Vocational Apprentices):

- 163 subject fields have been designated for the category of Graduate and Technician apprentices.
- 137 Subject fields have been designated for the category of Technician (Vocational) apprentices.
- Period of post-qualification training for these categories is one year.

- Seats are allocated based on managerial/supervisory posts and training facilities.
- Training programme is prepared in joint consultation between the Apprenticeship Adviser and the Establishment concerned.
- Certificates are awarded upon completion of training by the Department of Education and the Ministry of Human Resource Development.

Craft Instructor Training Scheme (CITS):

- The training of craft instructors is the responsibility of Directorate General of Training (DGT), the Ministry of Skill Development and Entrepreneurship (Formerly the Ministry of Labour and Employment) and Directorate General of Employment and Training (DGE&T). The craft instructors' Training Scheme has been operational since the inception of the Craftsmen Training Scheme. The first craft instructors' Training Institute was established in 1948. Subsequently, 13 more institutes known as, Central Training Institute for Instructors (now called as National Skill Training Institute (NSTI)) were established in Ludhiana, Kanpur, Howrah, Mumbai, Hyderabad, Bangalore, Calicut, Bhubaneswar, Jodhpur, Haldwani, Dehradun, and Jamshedpur by DGT.
- The objective of the Craft Instructor Training is to train Instructors in the techniques of transferring hands-on skills, to train semi-skilled / skilled manpower for industry. The structure of the training program is designed to provide comprehensive training in both Skill Development and Training Methodology.
- In 2010, the Government allowed the setting up of the Instructor Training Institute by State/UT Governments/ companies such as sole propriety, private/public limited companies registered under the companies Act, societies and trusts registered as per the Act, and promoters of SEZs. To maintain the quality and standards of Instructor Training, NCVT has approved separate standards for infrastructure and course curriculum. The institute that meets these standards are affiliated with NCVT. These institutes are named Institute for Training of Trainers (ITOT). Upon completion of the training trainees will be trade tested and awarded the National Craft Instructor Certificate. Guidelines for setting up ITOTs were issued in January 2012.
- The NVTI at Noida and RVTI at Mumbai, Bangalore, Trivandrum, Jaipur, Allahabad, Indore, Vadodara, Panipat, Kolkata, Tura, Shimla, Rajpura, Trichy, Agartala and Patna also impart Instructor Training Courses exclusively for women in various trades like Secretarial Practice (English), Secretarial Practice (Hindi), Electronic Mechanic, Dress Making, Computer Aided Embroidery & Needle Work, Fashion Technology, Architectural Assistantship and Beauty Culture & Hair Dressing.
- Under this programme, Instructors from Government/ Private ITIs and Centers established by industries under the Apprentices Act are trained. Training in 24 Engineering and 10 Non-Engineering trades is being offered in these institutes. A second shift has also been started to increase the seating capacity under the Crafts Instructor Training Programme. The total seating capacity in the Institutes mentioned above is over 13,000.
- To make instructor training more effective, a semester pattern of Craft Instructor Training in place of conventional one year training has been introduced in NSTIs and ITOTs since the 2014 session.

Advanced (Vocational) Diploma:

The Directorate General of Training (DGT) under the Ministry of Skill Development and Entrepreneurship offers a range of Vocational Training courses catering to the needs of different sectors of Economy/Labour market. The Vocational Training Programs are delivered under aegis of the Directorate General of Training (DGT). The Craftsman Training Scheme (CTS) and Apprenticeship Training Scheme (ATS) are two pioneer programs of DGT for propagating vocational training. Recently, DGT started Technical Diplomas for different streams and are primarily implemented at DGT field institutes, and plans to expand to State Directorates.

The course is for two years of duration. In the first year, there are five core modules and each module being credit based and employable. Each module is 320 hours and is very much independent. In the second year, the trainee will take two elective modules out of three electives, each of 320 hours, and will do on-the-job training in Industry for 800 hours. Additionally, the trainees will pick up employability skills for 160 hours. After completing the training program, the trainee will be awarded a Technical Diploma by DGT which has worldwide recognition.

The courses include IT, Networking and Cloud, Automotive Technology, Welding Technology, Industrial Electronics and Automation.

Training Institutes under DGT in India:

The Central Training Institute has merged with Advance Training Institutes since June 2017.

The institutes under DGT with different names like NSTI, FTI, EPI, AHI, NVTI and RVTI are imparting skill based training but the skills are not reflected in the names of the institutes. To avoid confusion and ensure uniformity, as well as reflect the "Skill" in the name of the institute, the Government of India changed the name to "**National Skill Training Institute**" with effect from April 2018.

Centre has merged skill training bodies to form new councils:

The Union Cabinet approved the merger of the existing regulatory institutions in the skills space, NCVT and NSDA, into the National Council for Vocational Education and Training (NCVET) with effect from (October 10, 2018).

The primary functions of NCVET include the recognition and regulation of awarding bodies.

Merging of Skill Training Bodies:

The new body will regulate the functioning of entities engaged in vocational education and training, both long-term and short-term by establishing minimum standards for the functioning of such entities.

The primary functions of NCVET includes:

- Recognition and regulation of awarding bodies, assessment bodies and skill related information providers.
- Approval of qualifications developed by awarding bodies and Sector Skill Councils (SSCs).

- Indirect regulation of Vocational Training Institutes through awarding bodies and assessment agencies.
- Research and information dissemination and grievance redressal.
- The Council would be headed by a Chairperson and will have executive and non-executive members.

The merger will improve the quality and market relevance of skill development programs lending credibility to Vocational Education and Training by encouraging greater private investments and employer participation in the skills space.

Schemes which are implemented by DGT are:

- Craftsmen Training Scheme (CTS)
- Apprenticeship Training Scheme (ATS)
- Women Occupational Training Scheme (WOT)
- Craft Instructor Training Scheme (CITS)
- Short term courses

Women Training:

Overview:

The Women's Vocational Training Programme under the Ministry of Skill Development and Entrepreneurship provides skill training to women in the country and aims to stimulate employment opportunities for social development, economic growth and the empowerment of women.

NSTIs (erstwhile NVTI/RVTIs) for women are set up mainly to produce women instructors. These trained instructors provide training to students through a network of Industrial Training Institutes (ITIs) all over the country.

NSTIs for women have been set up with the needs of women from lower income strata in mind. Many practices such as raw material preparation, merit-cum-means stipends/scholarships, hostel facilities etc. have been adopted to attract girls and women for skill training with effect from October 2018.

The NSTIs for women organize NCVT approved skill training programmes under the Craftsmen Training Scheme (CTS) and Craft Instructors' Training Scheme (CITS) in trades such as Electronics Mechanic, Architectural Draughtsmanship, Computer Operator and Programming Assistant, Secretarial Practice, Cosmetology, Dress Making, Catering & Hospitality, Interior Decoration & Designing etc.

Vocational Training exclusively for women were earlier provided through 11 National Skill Training Institutes (NSTIs) for women, one each at Noida, Mumbai, Bengaluru, Thiruvananthapuram, Panipat, Kolkata, Tura, Allahabad, Indore, Vadodara, and Jaipur.

To enhance the skill training facilities for women in India, the establishment of 8 New NSTIs (erstwhile RVTIs) have been approved by the Government of India in states where there were no existing NSTIs for women. Out of these 8 NSTIs (W), 07 NSTIs (W) have started functioning in the states of Punjab, Himachal Pradesh, Bihar, Tripura, Tamil Nadu, Telangana, and Goa.

A total of 4,664 regular seats have been sanctioned in NSTIs for women in 2017-18 in various training courses under CTS and CITS. Since inception, 1,45,000 women trainees have been trained in these institutes.

Short Term Courses:

Short term courses are conducted to impart training for updating the skills of Engineers, Supervisors, Technicians Executives of Industrial personnel and faculties of educational institutions. These courses of short duration are conducted in modules and tailored to the specific needs of industries Government Estt, PSUs and Technical Institutions. This courses are conducted for higher skill upgradation through intensive skill-oriented training by using latest equipment and machinery used in the industry.

Regional Directorate of Skill Development and Entrepreneurship (RDSDE):

The Government of India, in the Ministry of Skill Development and Entrepreneurship, initiated a step in December 2018 for further improving skill training and apprenticeship training and ensuring effective integrated development and monitoring of these programmes at the State level. After careful consideration, it was decided to set up Regional Directorates of Skill Development and Entrepreneurship (RDSDEs) for each State / UT. Proposed RDSDEs would subsume the existing activities, personnel, assets and liabilities including lands and buildings of erstwhile Regional Directorates of Apprenticeship Trainings (RDATs) located all over India. Hence, the office of RDATs would cease to exist. However, the existing Central Field Institutes viz, National Skill Training Institutes (NSTIs) / NSTI (W) would be an integrated subordinate formation under respective RDSDEs. Heads of RDSDE would be known as Regional Directors. RDSDEs would be Attached Offices of the Ministry.

Sl.No.	Name of the RDSDE	Headquarters	Territorial Jurisdiction Names of Central Field	(Names of the States /UTs) Institutes (CFIs) under RDSDE
1	RDSDE Andhra Pradesh	Vijayawada	Andhra Pradesh	
2	RDSDE Assam	Guwahati	Assam, Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland and Tripura	NSTI (W) Tura, , NSTI(W) Agartala

Sl.No.	Name of the RDSDE	Headquarters	Territorial Jurisdiction Names of Central Field	(Names of the States /UTs) Institutes (CFIs) under RDSDE
3	RDSDE Bihar	Patna	Bihar	NSTI (W) Patna
4	RDSDE Chhattisgarh	Raipur	Chhattisgarh	
5	RDSDE Gujarat	Gandhi Nagar	Gujarat Dadra and Nagar Haveli, Daman and Diu	NSTI (W) Vadodara
6	RDSDE Haryana	Chandigarh	Haryana, (Chandigarh (UT))	NSTI(W) Panipat
7	RDSDE Himachal Pradesh	Shimla	Himachal Pradesh	NSTI(W) Shimla
8	RDSDE Jammu & Kashmir	Jammu	Jammu & Kashmir	NSTI(W) Jammu
9	RDSDE Jharkhand	Ranchi	Jharkhand	NSTI Jamshedpur
10	RDSDE Karnataka	Bengaluru	Karnataka	NSTI-1 Bengaluru, NSTI-2 Bengaluru, NSTI (W) Bengaluru
11	RDSDE Kerala	Thiruvananthapuram	Kerala Lakshadweep	NSTI (W) Thiruvananthapuram NSTI Calicut
12	RDSDE Madhya Pradesh	Bhopal	Madhya Pradesh	NSTI(W) Indore
13	RDSDE Maharashtra	Mumbai	Maharashtra Goa	NSTI Mumbai, NSTI(W) Mumbai, NSTI(W) Goa
14	RDSDE Odisha	Bhubaneswar	Odisha	NSTI Bhubaneswar
15	RDSDE Punjab	Ludhiana	Punjab	NSTI Ludhiana NSTI(W) Mohali
16	RDSDE Rajasthan	Jaipur	Rajasthan	NSTI(W) Jaipur, NSTI Jodhpur
17	RDSDE Tamil Nadu	Chennai	Tamil Nadu, Puducherry, Andaman & Nicobar Islands	NSTI Chennai, NSTI (W) Trichy,
18	RDSDE Telangana	Hyderabad	Telangana	NSTI 1 Hyderabad NSTI 2 Hyderabad NSTI (W) Hyderabad
19	RDSDE Uttarakhand	Dehradun	Uttarakhand	NSTI Dehradun NSTI Haldwani
20	RDSDE Uttar Pradesh	Kanpur	Uttar Pradesh	NSTI Kanpur, NSTI(W) Allahabad
21	RDSDE West Bengal		West Bengal Sikkim	NSTI Kolkata, NSTI(W) Kolkata
22	RDSDE Delhi	Delhi	New Delhi	NSTI(W) Noida

Roles and Responsibilities of an Instructor

Discuss on Vocational Training

Objectives: At the end of this exercise, you shall be able to:

- conduct a discussion session on Vocational Training and its importance
- identify the learning difficulties through discussion and feedback
- test the knowledge level of the training procedures.

Requirements

Tools/Equipments

- Classroom with the required teaching aids
- 1 batch of 20 trainees
- Pen, Notepad/ Questionnaire - 20 Nos

PROCEDURE:

TASK1: Perform / Conduct a discussion session on Vocational Training

- 1 Check the seating arrangements of the trainees for the discussion session.
- 2 Distribute the necessary stationery items to the trainees.
- 3 Inform the total time allotted for the discussion session.
- 4 Start the discussion (following points may be included in the discussion).
 - Describe the importance of training and the purpose of training.
 - Differentiate between formal and informal training.
 - State the advantages of training.
 - Distinguish between education and training.
- 5 Mark the observations in the observation / data recording sheet against each trainee's response.

Note:

- Before beginning the discussion, trainees can be allowed 5 minutes to think and mentally prepare for the discussion.
- Each trainee should actively participate in the discussion on vocational training with valuable points.

Trainer may have a Data recording sheet as shown below:

SI No.	Name of the Trainee	Topics / points discussed	Trainer's Remark
1			
2			
3			
4			
5			

Note: All the important points discussed by the trainees should be noted and summarised by the trainer.

TASK 2: Identify the learning difficulties through discussion

Note: It is important for an instructor to periodically examine the effectiveness of his/her teaching. Understanding the level of the learners can be achieved by asking questions and collecting feedback information from the trainees.

- 1 Prepare a Questionnaire and distribute to all the trainees.
- 2 Allow 10 minutes for the trainees to fill out the questionnaire.
- 3 Collect the questionnaire.

- 4 Analyse the answers given by the trainees.
- 5 Identify the strength and weakness of every individual trainees.
- 6 Develop the trainees' attitude toward learning

Note:

- Discussed points should be noted by the trainer.
- Check the questionnaire and motivate the trainees to improve their initiatives and appropriate involvement in the classroom to achieve better results.

A model feedback questionnaire: (to be given to the trainees)

Name of the Trainee:			
Questions			
1 The instructional process is helping you to make progress	Very well Average Below Average		
2 Your suggestions to improve the teaching learning process	1. 2. 3.		
3 List the learning difficulties faced by you	1. 2. 3.		
4 Level of trainees work habits (responsibility, completing assignments on time, etc.)	• Able to do • Difficult to do (mention the difficulty in words)		
5 What are your strength and weakness (in learning)	Strength: Weakness:		

TASK 3: Conduct a group discussion on 'Training procedures'

- 1 Form 5 groups among the trainees (each group 4 trainees).
- 2 Inform the topic to be discussed 'What do you know about training procedures?

Following points may be included in the discussion.

- What is CTS? How to get admission?
- What is CITS? How to get admission?
- What is NCVT?

- What are the 1 year courses and 2 year courses under NCVT?
- 3 Allow 5 minutes for the trainers to think and prepare for the group discussion.
 - 4 Invite the groups one by one and start the discussion.
 - 5 Note all the important points discussed by the trainees in the observation table.

- 6 Summarize the outcome of the discussion.

Note: Trainees should actively participate in the discussion on 'Training Procedures'. CTS admission, CITS admission, Common entrance test, final trade test, NCVT certificate, etc.

Roles and Responsibilities of an Instructor

Objectives: At the end of this lesson, you shall be able to:

- distinguish the terms Teacher, Trainer and Instructor
- state the role of an Instructor
- explain the responsibilities of an Instructor.

Education:

Education is the acquisition of knowledge through a process of receiving or giving instruction.

It can be categorized into Formal and Informal.

Formal Education:

Formal education is acquired from school, colleges or universities.

Informal Education:

Informal education refers to learning that occurs independently outside of the traditional classroom through experience and social interaction.

Difference between Formal and Informal Education:

Sl.No.	Formal Education	Informal Education
1	Acquired from school, college or universities	Acquired through experience and social interaction
2	Choice of field is available	Choice of field is not available
3	Must have a definite syllabus	No prescribed syllabus
4	Guidance is essential and provided by qualified teacher	Guidance is essential but obtained from members of society.

Training:

Training involves teaching a particular skill or a type of behavior. It is defined as a systematic process to develop the knowledge, skills and attitudes of the learners.

Difference between Education and Training:

Sl. No.	Education	Training
1	Method of gaining knowledge	Method of skill development
2	Teaches general concepts	Teaches certain tasks
3	Theoretical orientation	Practical application

Sl. No.	Education	Training
4	Related to managerial, behavioral, and attitudinal development	Related to technical skills learning
5	Classroom learning	Job Experience
6	Broad perspective	Narrow perspective
7	Academic	Professional or vocational
8	Long term process	Short term process

Vocational Education:

Vocational education is a form of education focused on the direct and practical aspects of a specific trade or craft. It is designed to provide the technical knowledge required to complete the tasks of a particular job. Vocational education is sometimes referred to as career and technical education.

Vocational Training:

Vocational training is focused on helping individuals develop the skills necessary for employment. It may include general job skills training but is usually directed toward learning the skills required for a specific job or vocation. Unlike general academic instruction, vocational training is usually limited to teaching the processes and knowledge required to perform on the job. Vocational training is sometimes called Vocational Education Training (VET).

Teaching:

Teaching is the act of imparting instructions to learners in a classroom setting.

Objectives of Teaching:

Teaching is a role with many responsibilities and goals have a lot of responsibilities. The following objectives form the foundation of the job and teachers should work every day to fulfill their objectives.

- To help students acquire knowledge and wisdom.
- To shape character and behavior.
- To motivate students.

Instruction:

Instruction is the transfer of learning from one person to another in which directions are given or told how to do something. Instruction makes learners dependent on the

teacher. Instructions must be understood and followed strictly in order to accomplish a particular task.

Teacher: A person who works to impart knowledge in an official institution of formal education and is responsible for the overall learning progress of the learners.

This includes teachers working in preschools, schools, Colleges, Universities etc.

Trainer : A person who guides and supports someone in acquiring new physical skills by guiding them in physical activities and demonstrating the ways to achieve the desired goals in a systematic manner.

Examples of a gym trainer includes sports trainer, dance trainer, etc.

Instructor : A person who provides live interactions to learners during a learning activity that is part of a program.

Role of an Instructor:

An instructor has several important roles in a training institute.

As an Organizer:

- **Organizing a training programme:** Based on the syllabus provided, the Instructor organizes the entire training program by analyzing it further.
- **Preparing training material:** Before starting the course, the Instructor prepares various teaching aids such as lesson plans, information sheets, training aids, demonstration plans, etc. This requires numerous preparations.
- **Conducting a training programme:** The main job of a vocational instructor is to conduct training program, which includes planning, preparation, presentation, testing and evaluation.
- **Demonstrating in Workshops:** For acquiring a particular skill, certain steps must be followed. For example, in 'stitching of a garment' topic, an instructor,
 - 1 Draws the style feature on a chalkboard
 - 2 Drafts it on a board or paper
 - 3 Marks the paper pattern on the cloth
 - 4 Performs the cutting
 - 5 Lastly, stitches the cut components with a sewing machine.

Trainees learn the entire cutting and stitching procedure through this procedure.

- **Enabling Attitude Formation:** An instructor must motivate and guide the trainees to improve the attitudes towards the training without which they cannot acquire the skills taught.
- **Performing Evaluation and Grading:** No training is complete without proper evaluation and grading. The extent of instructional objectives achieved is determined through testing and evaluation. Grading helps the learners to perform better than their previous test. Instructor's efficiency in teaching can also be assessed through evaluation and grading.

As a Manager:

- **Maintenance of tools and equipments:** Various kinds of tools and equipments are required for conducting training. An instructor has to procure these tools and equipments as per the syllabus and maintain them properly.
- **Supervise the Practical Training:** During practical exercises, it is essential for the instructor to be present with the trainees. Providing theoretical knowledge is not enough. The instructor must physically supervise and guide the trainees.
- **Liaison with the institution:** The instructor is the link between the administration and the trainees. Instructor must inform the administration about the training activities of the trade, and keep the student updated on instructions issued by the administration.

As a Student:

Vocational instructors should always update their knowledge, and skills with new techniques, according to the technological advancement.

Responsibilities of an Instructor:

In addition to the responsibilities of teaching-learning processes, the instructor has responsibilities towards:

- The learners/trainees
- The administration
- The industries
- The society and nation
- Themselves
- The profession
- The parents

Responsibility Towards the Learners Trainees:

Trainees come to the institute to become a competent craftsman. To fulfill this aim of trainees, the trainer must:

- Guide and instruct them properly and complete the training programme as per the schedule.
- Evaluate the trainees performance and helps the trainees who are below the average level to the required standard level.
- Develop attitudes and safe working habits in trainees to use raw materials economically that are given for learning purpose.
- Must cultivate good habits such as workshop safety, punctuality, time management, etc.

Responsibility Towards the Administration:

An Instructor is the link between the trainees and the administration. He should:

- Be Loyal and Sincere towards the administration.
- Interpret and communicate working policies to the trainees while supporting the administration.

- Does not waste material through excessive disposal.
- Maintain discipline and also report of any incidents to the administration.

Responsibility Towards the Industries:

Given that industrial establishments are the beneficiaries, the instructor should:

- Suggest changes in the training program for day-to-day development.
- Keep himself updated about the latest technologies, equipments, materials in the industry.
- Maintain liaison with industries through field visits and placements, etc.

Responsibility Towards Society and the Nation:

Teaching is more than providing skills and knowledge for a particular trade. Training should develop the society and benefit the nation as a whole. To achieve this, the instructor can influence the learners by:

- Developing a sense of responsibility towards the society.
- Making them realize that when they get something from the society they also have to contribute to the society.
- Building a society which will ultimately help in building a nation. The trainees should develop this sense of building a nation.

Responsibility Towards Herself/Himself:

The instructor's job is a noble one with numerous responsibilities in the course of performing the job.

- He/She should be sincere and honest towards the profession.

- Takes maximum efforts to develop his/her personality.
- Cultivate pleasant manners.
- Maintains the dignity of the profession.
- Keeps good health and updates his/her knowledge.
- Takes interest in teaching.

Responsibility Towards the Profession:

The instructor must constantly update his/her knowledge and skills to improve the process of teaching and learning. Then the following innovative strategies and techniques will significantly improve the training programmes.

Instructor can do this by:

- Adopting a positive attitude towards innovative methods.
- Understanding the basics and application of research findings.
- Following better and tested new strategies and techniques.
- Utilisation self - study materials for self-improvement.
- Identification of various principles and factors that aid productive learning and carefully developing an during course materials.

Responsibility Towards the Parents:

As an instructor, he/she should develop proper liaison with trainees and their parents acting as a link between them. Therefore, he/she should,

- Keep parents updated about the progress and shortcomings of the trainees.
- Guide the parents in deciding the future career of the trainees.

Essential Traits of a Good Instructor

Objectives: At the end of this lesson, you shall be able to:

- state the prerequisites of an Instructor
- explain the personality of a good Instructor
- brief the qualities of an Instructor
- list the traits of a good Instructor.

Prerequisites of an Instructor:

The requisites and prerequisites of an instructor include the abilities and qualities essential for the role. These include communication skills, subject knowledge, and experience.

Qualification:

The instructor must fulfill certain qualifications required for the post. These qualifications are classified into two types. They are:

- Essential Qualification
- Desirable Qualification.

Without these necessary qualifications, one cannot be considered for the post of instructor.

Personality Traits of a Good Instructor:

Habit and Personality:

Habits are voluntary actions repeated frequently by an individual. Good habits can be developed through self-thinking, self-motivation, etc. and after forming the habits, they can be further developed through firm determination, continuity, practice, and encouragement.

Personality is influenced by one's mental, physical, and emotional interaction with others. Personality refers to the physical, mental, moral, and social values of a person.

Types of Personalities:

There are two types of personalities:

- Introvert
- Extrovert

Introvert: People who are reserved, do not like to mix with others, prefer to work alone, are better in writing than speaking, are fond of books and magazines, do not like self-praise, etc. belong to Introverted personality group.

Extrovert: Those who mix freely with people, speak fluently, are friendly, and do not get easily embarrassed or harmed are known as extrovert personality.

Individuals who exhibit both of these qualities are called **Ambiverted Personality**.

Factors Influencing Personality Development:

- **Physical** : Appearance, voice, speech, and tone.
- **Mental** : Intelligence, wisdom, memory, thinking, and reasoning.

- **Environmental** : Family, relatives, neighbours and society.
- **Emotional** : Cheerful, nervous, temper and anxiety
- **Gender/Sex** : Men or women
- **Cultural** : Religion and community.

Personality Development:

Personality is defined as the enduring personal characteristics of an individual. Personality development is the organised pattern of behaviour and attitudes that makes a person distinctive. Personality development occurs through ongoing interaction of temperament, character, and environment.

Qualities of an Instructor:

Qualities of an instructor can be classified as:

- Physical Quality
- Mental Quality
- Moral Quality
- Personal Quality

Physical Quality:

- **Good Health:** An instructor can be prompt, regular, enthusiastic, by maintaining good health.
- **Dress and Appearance:** An instructor's dress must always be simple and neat. Instructors must avoid wearing attractive clothing that may distract the learners.
- **Voice:** An instructor's voice must be clear and audible. It must not be harsh or monotonous.
- **Language and Speech:** The language of an instructor should be simple, clear, and easily understandable. It should not be ornamental or grammatically incorrect. Instructors should develop themselves to be good orators.

Mental Quality:

- Knowledge of the subject.
- Knowledge of principles and methods of teaching.
- Understanding the psychological factors that aid in learning.

Moral Quality:

- **Justice and impartiality:** An instructor must be impartial with their trainees.
- **Self - control and willpower:** An instructor must have good self-control and willpower to face the trainees.
- **Sympathy and perseverance:** An Instructor should have sympathy, kindness, and immense patience.

Personal Quality:

- **Leadership:** An instructor must have leadership qualities to guide and instruct the trainees properly.
- **Class control:** Class control is an important factor for maintaining discipline. Without discipline we cannot expect the desired learning outcome.
- **Class manners:** An instructor behavior towards the trainees should be very polite and gentle. The instructor must not address them rudely and refrain from insulting them.
- **Good habits:** An instructor must have good habits such as punctuality, regularity, honesty, and sincerity.

Traits of a Good Instructor:

As teaching is a noble task, an instructor must acquire the knowledge and skills required for teaching. The following are the most important factors to be performed by an instructor.

- Must make the course interesting.
- Must possess a sense of promoting knowledge and skills.

- Must encourage trainees' participation.
- Must admire the interest of the trainees.
- Should be neatly dressed.
- Should be socially flexible.
- Should provide a variety of learning experiences.
- Should have a friendly personality.
- Should have sound knowledge of the subject.
- Should possess a balanced and business - like attitude.
- Should show a great deal of enthusiasm.
- Should use many illustrations
- Should have a pleasant voice.
- Should readily assume responsibility.
- Should have a moderate and honorable view.
- Should use knowledge and skills for transfer and application.
- Should be reasonably strict and maintain discipline.
- Should have teaching material well organized.
- Should be fair in evaluation.
- Must maintain proper training records.
- Should be punctual.
- Should use tools, materials, and equipments economically.

Training Methodology Roles and Responsibilities of an Instructor

Exercise 1.1.03

Introduction , Skill Development Programmes of DGT

Objectives: At the end of this exercise, you shall be able to:

- **conduct a feedback session**
- **receive the feedback through questionnaire**
- **analyse and interpret the data collected from the feedback questionnaire.**

Requirements

Tools/Equipments

- Classroom with the required teaching aids
- 1 batch of 20 trainees
- Pen, Notepad/ Questionnaire - 20 Nos.

PROCEDURE:

TASK1: Conduct a Feedback Session on Instruction

- 1 Prepare a feedback questionnaire on the nature of instruction and effectiveness of teaching.
- 2 Distribute the questionnaire to the trainees
- 3 Allow 15 minutes for the trainees to think and mark the questionnaire. Collect the data.
- 4 Analyse the information given in the questionnaire.
- 5 Identify the topics where trainees need more explanation to better understand the subject.
- 6 Plan and prepare well to help the trainees understand the subject better.

Note: In the feedback questionnaire, rate each question using the following scale:

5 - Strongly Agree

4 - Agree

3 - Average

2 - Disagree

1 - Strongly Disagree

Be honest and open with your answer.

Feedback Questionnaire:

Question No.	Question	Score				
1	I thoroughly understand my trade.	5	4	3	2	1
2	I understand the theory taught in classes well.	5	4	3	2	1
3	I understand the practical demo classes properly.	5	4	3	2	1
4	I properly understand the language used by the teacher while communicating.	5	4	3	2	1
5	I thoroughly understand the orientation and training topics.	5	4	3	2	1
6	I thoroughly understand the role of the instructor.	5	4	3	2	1
7	If I have any doubt immediately ask my teacher and clarify it.	5	4	3	2	1
8	Do you have any other specific feedback for improvement?					

Results:

28 to 35 – Better level of understanding.

21 – Average.

Below 21 – Needs improvement.

Note: Teacher should motivate the trainees who score lower. Put additional efforts into teaching to improve the trainees learning ability.

Consolidated Feedback Response:

Sl. No.	Name of the Trainee	Feedback Score	Observation by Instructor	Action Taken

Characteristics of Good Instruction and Common Defects in Instruction

Objectives: At the end of this lesson, you shall be able to:

- explain the characteristics of good instruction
- state the elements of vocational training
- brief the common defects in instructor.

Characteristics of Good Instruction:

Effective teaching depends on the factors that aid in trainees' learning. Effective teaching can mean different things in different environments. An instructor must be prepared to teach with interest, motivation, and ability. Key elements that helps in planning a complete and successful training programme are listed below. These elements are useful for an effective teaching-learning process.

- **Need Assessment:** Training programs should be planned and organized only if a particular trade has a demand in the industry or by the people of a particular area. Positive learning atmosphere is made based on this need.
- **Planning:** Systematic planning must be made before teaching. This includes consideration of available resources, raw materials, necessary teaching time, objectives, methods etc.
- **Preparation:** Preparation includes both instructor and the learner's preparation. The duration of quality time of teaching depends on clearly stated objectives. If the objectives are not clear, the teaching time may exceed more than the allotted time. The learner's participation can be initiated by asking introductory and thought provoking questions that link the learner's previous knowledge to the present topic.
- **Method:** Suitable method of imparting training should be selected. For theory, lecture and lesson plan methods are best. Practical demonstration methods may be adopted.
- **Media:** Suitable media and teaching aids utilized for the purpose of teaching must be selected in advance. If media is not readily available, the instructor should prepare it.
- **Motivation:** Motivation aims at creating willingness. An instructor must motivate the learners by creating interest and willingness towards learning by explaining the purpose of learning with suitable examples.
- **Presentation:** Presentation is a very important characteristic of effective teaching. Presentation of the information should be in a sequence ranging from simple to complex. Lessons must be presented and taught with the objectives and on previously taught lessons to stimulate learner's prior knowledge. The more the stimulus, the more will be the response.

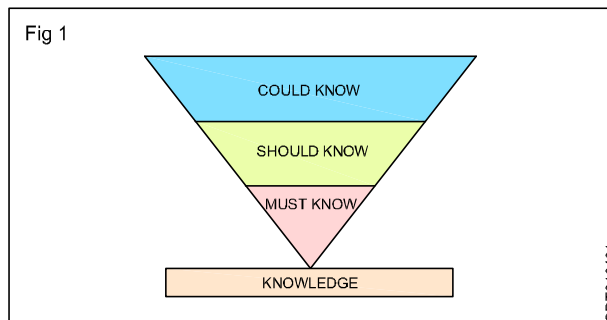

Stimulate the learners by giving examples, showing models, and other visual aids in the appropriate time.

- **Questioning:** Questioning should not only occur at the end of the teaching, but is also adopted at all stages. An instructor will understand the trainees' response and can get satisfaction that the learners are grasping what is being taught, through interaction and questioning.
- **Evaluation:** After teaching, evaluation must be done in order to measure the extent of the instructional objectives that is achieved. The success of the training can be determined by evaluating the trainee's performance.
- **Feedback:** Feedback is an essential part of the teaching-learning activity. The purpose of getting feedback is to help the learners to solve the unsolved problems. Feedback should be gathered immediately after presenting the lesson. It will also help the trainer in self evaluation.

Elements of Vocational Training:

Important elements of vocational training are:

- Knowledge
- Skill
- Attitude and Productivity.
- **Knowledge:** Knowledge involves gaining information. To acquire a skill, one must have thorough knowledge about the skill. Knowledge is classified into three types (Fig 1).

- 1 Must know knowledge:** This is an essential information that is necessary to perform a skill. Without this, it is quite impossible to initiate the work.
- 2 Should know knowledge:** This is an additional information that will enable the trainees to do their work in a better way.

3 Could know knowledge: This includes further information required for updating the individuals. It will also improve efficiency and productivity.

- **Skill:** Skill is the ability or capacity or expertise to perform a particular job. For performing any operation in a systematic manner skill is required. For example, before stitching a garment, the cloth should be cut as per the measurements and then stitched. The skill, of the trainer, must be transferred to the trainees. Vocational training helps individuals to acquire job related skills. Basic skills comprises of the following factors:

- Accuracy
- Speed
- Workmanship
- Concentration
- Method

- **Attitude:** It is a way of thinking, doing, and behaving. In educational terms 'attitude' is defined as a learners tendency to evaluate things properly. Cultivating a positive attitude towards learning among the trainees is one of the important elements of vocational training. Unless the trainees are ready to learn they tend to lack interest. This state of mind is possible when the trainees have qualities such as initiativeness, enthusiasm, coordination, punctuality, self-control, willpower, judgment, promptness, speed, understanding, etc. These good qualities of an individual are part of the Attitude. For performing any kind of work, positive attitude towards the work is important.

- **Productivity:** Productivity is the tendency of making products. It is the amount of output per unit of given input by means of man, machine, and materials. After training in vocational skills, a trainee should be able to do job in the related trade to get productivity. Higher productivity can be achieved only with the help of the 'skill and will'.

Common Defects in Instruction:

The instructor must avoid the following common deficiencies:

- Defects in personality.
- Inadequate preparation.
- Improper method of presentation.
- Improper evaluation.
- Inadequate human relationships.

Defects in Personality:

- Unnecessary actions while teaching.
- Nervousness.
- Bad mannerisms.
- Overconfidence.

- Lack of interest or ambition.
- Physical defect or lack of mental alertness.
- Lack of manipulation ability.

Inadequate Preparation:

- Improper analyses of the syllabus.
- Lack of understanding of the main objectives of the course.
- Improper planning in the preparation of resources used and training aids.
- Lack of subject knowledge.
- Irrelevant written instructional materials.
- Unable to organize the methods for learner involvement.

Improper Method of Presentation:

- Incorrect presentation method such as starting the subject without any introduction or motivation etc.
- Incorrect method of instruction such as dictation method which is the worst for vocational training.
- Not adopting the proper questioning technique.
- Improper use of teaching or training aids.
- Shouting or murmuring while presenting the subject.
- Irrelevant assignment.

Improper Evaluation:

- Improper method of evaluation procedure.
- Unfairness in evaluation.
- Inaccuracy in evaluation.
- Partiality.

Inadequate Human Relationships:

- Failure to gauge the standard of the trainees.
- Failure to measure their level of competency, grasping power, etc.
- Failure to develop a friendly atmosphere.

Bad Mannerisms:

Bad mannerism are undesirable habits exhibited by a person.

Causes of Bad Mannerism:

Lack of confidence

Improper learning situations

Poor subject knowledge

Poor health condition

Nervousness
